

JASE-World: Smart Energy Products

WHO ARE WE?

Established on Oct. 30, 2008, the Japanese Business Alliance for Smart Energy Worldwide (JASE-World) was formed as a new, comprehensive government-industry partnership for implementing the energy conservation business overseas. Smart Energy Products & Technologies will provide the following to anyone seeking to save energy:

- Information on products/technologies divided into seven sectors for easy reference
- Easy to understand pictures and charts
- Contact points for easy access to further information

WHY US?

With years of experience in the research, development and manufacture of energy-efficient products and technologies, Japanese companies are at the forefront of today's "green" revolution. As such, Japanese companies now offer more than 150 state-of-the-art Smart-Energy Products & Technologies across seven sectors detailed below.

CONCEPTUAL IMAGE & CLASSIFICATION OF Japanese State-of-the-Art Smart Energy Products & Technologies

WHAT DO WE OFFER?

As the world faces the challenge of climate change, it is more important than ever to utilize the newest energy-efficient products and technologies, and renewable energy sources. Japan has emerged as a leader in this area, with companies supplying a variety of cutting-edge technologies to the market.
