

# Clean, Reliable Solar Power Modules

## WHAT IS OUR NEW TECHNOLOGY?

**Photovoltaic modules:** Mitsubishi Electric is one of the world's largest manufacturers and providers of solar power technology, including PV cells, modules and inverters.

Our eco-friendly photovoltaic modules are used throughout the world to bring clean, reliable energy to residences, businesses, power generation plants, schools, factories and areas without access to electricity, as well as other applications such as highway and stadium lighting.

In the United States, Mitsubishi Electric photovoltaic panels are marketed by Mitsubishi Electric & Electronics USA Inc., and sold only through authorized distributors and installers.

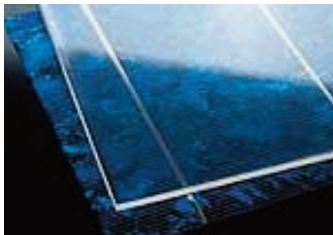

## WHAT SETS US APART?

Mitsubishi Electric's high-efficiency polycrystalline PV modules deliver clean reliable energy to customers around the world.

Our modules use 100% lead-free solder, our manufacturing facility complies with ISO 14001, and we have reduced our cardboard packaging per module in an effort to protect the environment.

Our PV modules are highly reliable, carrying a 25-year power-output warranty, and our modules have one of the tightest power tolerances in the industry of +/- 3%.

## WILL IT SELL?

Our commitment to producing eco-friendly products that use the latest polycrystalline technology combined with our power-output warrant and high performance in real-life conditions makes Mitsubishi Electric modules a desirable product for any customers interested in producing clean energy.
